

CDG SYNDROME SCIENTIFIC ARTICLES:

Aebi, M., Helenius, A., Schenk, B., Barone, R., Fiumara, A., Berger, E.G., Hennet, T., Imbach, T., Stutz, A., Bjursell, C., *et al.* (1999). Carbohydrate-deficient glycoprotein syndromes become congenital disorders of glycosylation: an updated nomenclature for CDG. First International Workshop on CDGS. *Glycoconj J* 16, 669-671.

Agarwal, B., Ahmed, A., Rushing, E.J., Bloom, M., Kadom, N., Vezina, G., Krasnewich, D., and Santi, M. (2007). Congenital disorder of glycosylation-X: clinicopathologic study of an autopsy case with distinct neuropathologic features. *Hum Pathol* 38, 1714-1719.

Al-Owain, M., Mohamed, S., Kaya, N., Zagal, A., Matthijs, G., and Jaeken, J. A novel mutation and first report of dilated cardiomyopathy in ALG6-CDG (CDG-Ic): a case report. *Orphanet J Rare Dis* 5, 7.

Alton, G., Hasilik, M., Niehues, R., Panneerselvam, K., Etchison, J.R., Fana, F., and Freeze, H.H. (1998). Direct utilization of mannose for mammalian glycoprotein biosynthesis. *Glycobiology* 8, 285-295.

Alton, G., Kjaergaard, S., Etchison, J.R., Skovby, F., and Freeze, H.H. (1997). Oral ingestion of mannose elevates blood mannose levels: a first step toward a potential therapy for carbohydrate-deficient glycoprotein syndrome type I. *Biochem Mol Med* 60, 127-133.

Arnoux, J.B., Boddaert, N., Valayannopoulos, V., Romano, S., Bahi-Buisson, N., Desguerre, I., de Keyzer, Y., Munnich, A., Brunelle, F., Seta, N., *et al.* (2008). Risk assessment of acute vascular events in congenital disorder of glycosylation type Ia. *Mol Genet Metab* 93, 444-449.

Artigas, J., Cardo, E., Pineda, M., Nosas, R., and Jaeken, J. (1998). Phosphomannomutase deficiency and normal pubertal development. *J Inherit Metab Dis* 21, 78-79.

Assmann, B., Hackler, R., Peters, V., Schaefer, J.R., Arndt, T., Mayatepek, E., Jaeken, J., and Hoffmann, G.F. (2001). A new subtype of a congenital disorder of glycosylation (CDG) with mild clinical manifestations. *Neuropediatrics* 32, 313-318.

Babovic-Vuksanovic, D., Patterson, M.C., Schwenk, W.F., O'Brien, J.F., Vockley, J., Freeze, H.H., Mehta, D.P., and Michels, V.V. (1999). Severe hypoglycemia as a presenting symptom of carbohydrate-deficient glycoprotein syndrome. *J Pediatr* 135, 775-781.

Barone, R., Carchon, H., Jansen, E., Pavone, L., Fiumara, A., Bosshard, N.U., Gitzelmann, R., and Jaeken, J. (1998). Lysosomal enzyme activities in serum and leukocytes from patients with carbohydrate-deficient glycoprotein syndrome type IA (phosphomannomutase deficiency). *J Inherit Metab Dis* 21, 167-172.

Barone, R., Pavone, L., Fiumara, A., Bianchini, R., and Jaeken, J. (1999). Developmental patterns and neuropsychological assessment in patients with carbohydrate-deficient glycoconjugate syndrome type IA (phosphomannomutase deficiency). *Brain Dev* 21, 260-263.

Barone, R., Sturiale, L., Fiumara, A., Uziel, G., Garozzo, D., and Jaeken, J. (2007). Borderline mental development in a congenital disorder of glycosylation (CDG) type Ia patient with multisystemic involvement (intermediate phenotype). *J Inherit Metab Dis* 30, 107.

Ben Hariz, M., Ben Mrad, S., Halioui, S., Rzgoui, L., Miladi, N., Tebib, N., Seta, N., and Maherzi, A. (2008). [Hepatomegaly and early cytolysis as presenting symptoms in CDG syndrome type Ia]. *Tunis Med* 86, 204-207.

Bergmann, M., Gross, H.J., Abdelatty, F., Moller, P., Jaeken, J., and Schwartz-Albiez, R. (1998). Abnormal surface expression of sialoglycans on B lymphocyte cell lines from patients with carbohydrate deficient glycoprotein syndrome I A (CDGS I A). *Glycobiology* 8, 963-972.

Bode, L., Eklund, E.A., Murch, S., and Freeze, H.H. (2005). Heparan sulfate depletion amplifies TNF-alpha-induced protein leakage in an in vitro model of protein-losing enteropathy. *Am J Physiol Gastrointest Liver Physiol* 288, G1015-1023.

Bode, L., and Freeze, H.H. (2006). Applied glycoproteomics--approaches to study genetic-environmental collisions causing protein-losing enteropathy. *Biochim Biophys Acta* 1760, 547-559.

Briones, P., Vilaseca, M.A., Garcia-Silva, M.T., Pineda, M., Colomer, J., Ferrer, I., Artigas, J., Jaeken, J., and Chabas, A. (2001). Congenital disorders of glycosylation (CDG) may be underdiagnosed when mimicking mitochondrial disease. *Eur J Paediatr Neurol* 5, 127-131.

Briones, P., Vilaseca, M.A., Schollen, E., Ferrer, I., Maties, M., Busquets, C., Artuch, R., Gort, L., Marco, M., van Schaftingen, E., *et al.* (2002). Biochemical and molecular studies in 26 Spanish patients with congenital disorder of glycosylation type Ia. *J Inherit Metab Dis* 25, 635-646.

Burda, P., Borsig, L., de Rijk-van Andel, J., Wevers, R., Jaeken, J., Carchon, H., Berger, E.G., and Aebi, M. (1998). A novel carbohydrate-deficient glycoprotein syndrome characterized by a deficiency in glucosylation of the dolichol-linked oligosaccharide. *J Clin Invest* 102, 647-652.

Butler, M., Quelhas, D., Critchley, A.J., Carchon, H., Hebestreit, H.F., Hibbert, R.G., Vilarinho, L., Teles, E., Matthijs, G., Schollen, E., *et al.* (2003). Detailed glycan analysis of serum glycoproteins of patients with congenital disorders of glycosylation indicates the specific defective glycan processing step and provides an insight into pathogenesis. *Glycobiology* 13, 601-622.

Calvo, P.L., Pagliardini, S., Baldi, M., Pucci, A., Sturiale, L., Garozzo, D., Vinciguerra, T., Barbera, C., and Jaeken, J. (2008). Long-standing mild hypertransaminasaemia caused by congenital disorder of glycosylation (CDG) type IIX. *J Inherit Metab Dis*.

Cantagrel, V., Lefeber, D.J., Ng, B.G., Guan, Z., Silhavy, J.L., Bielas, S.L., Lehle, L., Hombauer, H., Adamowicz, M., Swiezewska, E., *et al.* SRD5A3 is required for converting polyprenol to dolichol and is mutated in a congenital glycosylation disorder. *Cell* *142*, 203-217.

Carchon, H., Van Schaftingen, E., Matthijs, G., and Jaeken, J. (1999). Carbohydrate-deficient glycoprotein syndrome type IA (phosphomannomutase-deficiency). *Biochim Biophys Acta* *1455*, 155-165.

Carchon, H.A., Chevigne, R., Falmagne, J.B., and Jaeken, J. (2004). Diagnosis of congenital disorders of glycosylation by capillary zone electrophoresis of serum transferrin. *Clin Chem* *50*, 101-111.

Carchon, H.A., Nsibu Ndosimao, C., Van Aerschot, S., and Jaeken, J. (2006). Use of serum on Guthrie cards in screening for congenital disorders of glycosylation. *Clin Chem* *52*, 774-775.

Cassiman, D., Zeevaert, R., Holme, E., Kvittingen, E.A., and Jaeken, J. (2009). A novel mutation causing mild, atypical fumarylacetoacetase deficiency (Tyrosinemia type I): a case report. *Orphanet J Rare Dis* *4*, 28.

Casteels, I., Spileers, W., Leys, A., Lagae, L., and Jaeken, J. (1996). Evolution of ophthalmic and electrophysiological findings in identical twin sisters with the carbohydrate deficient glycoprotein syndrome type 1 over a period of 14 years. *Br J Ophthalmol* *80*, 900-902.

Chantret, I., Dancourt, J., Dupre, T., Delenda, C., Bucher, S., Vuillaumier-Barrot, S., Ogier de Baulny, H., Peletan, C., Danos, O., Seta, N., *et al.* (2003). A deficiency in dolichyl-P-glucose:Glc1Man9GlcNAc2-PP-dolichyl alpha3-glucosyltransferase defines a new subtype of congenital disorders of glycosylation. *J Biol Chem* *278*, 9962-9971.

Chantret, I., Dupre, T., Delenda, C., Bucher, S., Dancourt, J., Barnier, A., Charollais, A., Heron, D., Bader-Meunier, B., Danos, O., *et al.* (2002). Congenital disorders of glycosylation type Ig is defined by a deficiency in dolichyl-P-mannose:Man7GlcNAc2-PP-dolichyl mannosyltransferase. *J Biol Chem* *277*, 25815-25822.

Charuk, J.H., Tan, J., Bernardini, M., Haddad, S., Reithmeier, R.A., Jaeken, J., and Schachter, H. (1995). Carbohydrate-deficient glycoprotein syndrome type II. An autosomal recessive N-acetylglucosaminyltransferase II deficiency different from typical hereditary erythroblastic multinuclearity, with a positive acidified-serum lysis test (HEMPAS). *Eur J Biochem* *230*, 797-805.

Cheillan, D., Cognat, S., Dorche, C., Jaeken, J., Vianey-Saban, C., and Guffon, N. (2004). CDG IIx with unusual phenotype. *J Inherit Metab Dis* *27*, 103-104.

Cheong, F.Y., Sharma, V., Blagoveshchenskaya, A., Oorschot, V.M., Brankatschk, B., Klumperman, J., Freeze, H.H., and Mayinger, P. Spatial regulation of Golgi phosphatidylinositol-4-phosphate is required for enzyme localization and glycosylation fidelity. *Traffic* *11*, 1180-1190.

Chu, K.L., Chien, Y.H., Tsai, C.E., Freeze, H.H., Eklund, E., and Hwu, W.L. (2004). Carbohydrate deficient glycoprotein syndrome type Ia. *J Formos Med Assoc* *103*, 721-723.

Coddeville, B., Carchon, H., Jaeken, J., Briand, G., and Spik, G. (1998). Determination of glycan structures and molecular masses of the glycovariants of serum transferrin from a patient with carbohydrate deficient syndrome type II. *Glycoconj J* 15, 265-273.

Cohn, R.D., Eklund, E., Bergner, A.L., Casella, J.F., Woods, S.L., Althaus, J., Blakemore, K.J., Fox, H.E., Hoover-Fong, J.E., Hamosh, A., *et al.* (2006). Intracranial hemorrhage as the initial manifestation of a congenital disorder of glycosylation. *Pediatrics* 118, e514-521.
